

# Attention grandmothers!

We need your help with Dr. John Constantino's  
**Second Generation Survey Project**  
for families affected by **Autism Spectrum Disorder (ASD)**

The siblings of individuals with ASD are becoming parents themselves. *It is not yet known what the risk for ASD is among their children, how to predict it, and who might benefit from intervening early.*

**Grandmothers (or expectant grandmothers) must have a biological child with ASD.**

*Participation involves a phone call and brief mail-in surveys.  
Participants will be compensated for their time.*

**For more information or to enroll, call study coordinator Daniel Gray at (314) 362-3734 or email [iddrc@kids.wustl.edu](mailto:iddrc@kids.wustl.edu)**
